

ENDURANCE®

Solid & Secure Composite Doors

# PROTECT YOUR HOME WITH A SOLID AND SECURE DOOR

endurancedoors.co.uk

# Safety, Security & Style. It starts with an Endurance door.

Endurance Doors are renowned for their strength and security, without compromising on style.

At 48mm thick and with cross-bonded laminations, an Endurance door delivers unrivaled strength and dimensional stability. It's the first choice in delivering the highest level of security, providing home owners with peace of mind.

Made up of 17 laminations, Endurance Doors are almost 10% thicker than most composite doors, guaranteeing the safety and security of your family and your home.

With over 50 different door designs to choose from, available in a wide selection of colours with an array of different door furniture and glazing options, your Endurance Door can be as individual as you are.

# Endurance Doors are renowned for their strength and security, without compromising on style.

## Secured by Design

Secured By Design is the official UK Police flagship initiative supporting the principles of 'designing out crime'. The Endurance door range has been designed, tested and achieves the standard. For more information please see page 7.

## 10% thicker

Endurance residential doors are renowned for their strength and security, our 48mm thick cross-bonded veneered laminated composite door delivers unrivalled strength and dimensional stability and is a natural choice for high security, providing our home owners peace of mind.

## Solid timber core

Endurance Doors are made up of 17 engineered timber laminates. Kerto is a laminated veneered lumber (LVL) and it's what makes our composite doors the most secure on the market.

## £1000 security guarantee

We are so confident in the unprecedented level of security offered by the ATK 3 Star Diamond Cylinder used in Endurance Doors, that in the unfortunate event a home-owner is broken into by means of snapping the cylinder, Avocet Hardware will offer compensation of £1000. For more information please see page 84.

Detailed embossed wood grain texture door skins, **traditional look with modern technology**

**48mm thick** cross laminated LVL timber door leaf offers lateral **strength and stability**.

**High security multi- point locking system** that is tested to the Secured By Design specified PAS 24 security standard

Standard six pin euro cylinder which is anti-pick, drill, bump and has a sacrificial cut with **optional upgrade**

Door handles are salt spray tested to 480 hours **BS EN 1670**: Class 5

Optional low aluminium threshold for ease of access for wheelchairs and prams, Part M **compliant with Building Regulations**

## Did you know 73% of household burglary occurs via a door?*

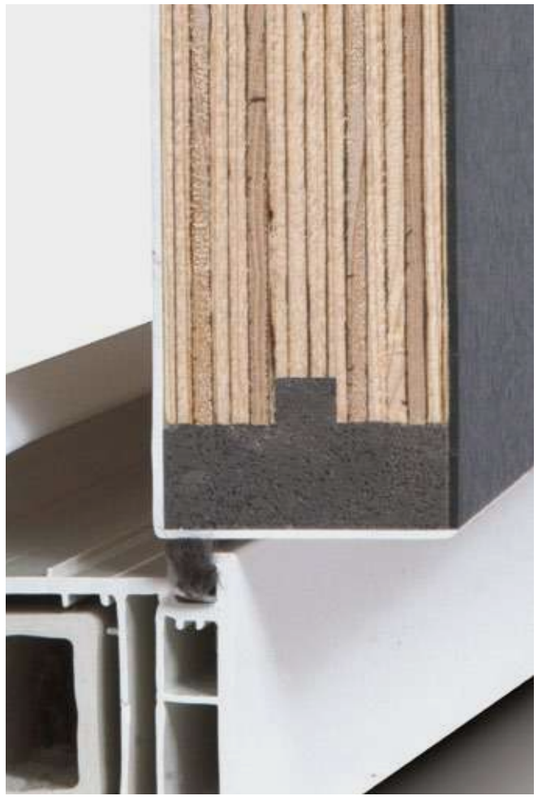

Endurance doors have been subjected to a number of controlled security tests to replicate the most common forms of attempted burglary. Even using a sledgehammer it would be very difficult to puncture a hole through the inner core and gain access, allowing you ultimate peace of mind.

Not only is the Endurance door tested for its resistance to loading and impacts, but also its durability to opening, closing and unlocking cycles, which typically occurs around 50,000 times during a door's life cycle.

*Source: Crime Survey for England and Wales. Office for National Statistics

BBA accredited Kerto LVL timber core.

Our innovative Moisture Barrier System is manufactured into the bottom of every single Endurance door.

### Moisture Barrier System (MBS)

Every Endurance door is manufactured with an integrated MBS to the bottom of the door leaf. The bonded cellular PVC profile is exclusively designed to stop moisture ingress, in order to prevent expansion and maintain the doors integrity. The MBS is concealed within the makeup of the door leaf during the manufacturing process, and gives homeowners extra peace of mind that an Endurance door will withstand the test of time.

**The Endurance door is tested and classified for its resistance to loading and impacts as well as the doors durability to repeated opening, closing and unlocking cycles - typically 50,000 times on a single door set.**

Secured By Design is the official UK Police flagship initiative supporting the principles of 'designing out crime'.

The Endurance door range has been designed, tested and achieves the standard. The Secured By Design standard upgrade includes - ATK 3 Star Diamond Cylinder and laminated glass. In order to comply with Secured By Design, the Endurance door must be tested to PAS 24 2012.

The standard involves the following tests:

- A manual attack on the locking hardware with tools including a crow bar and mole grips.
- Unlimited number of 3 minute attacks on the door cylinder using a range of tools such as craft knives and screw drivers.
- 3 minute manual attack using chisels and brick bolsters to gain entry through the door.
- Hard body impact test – impacts are applied to the door leaf at hinge points and locking points using a 50kg steel impactor.

Secured by Design
SBD
Police Preferred Specification

**The Endurance door range has been designed, tested and achieves the standard.**

### Hinges

The hinges are designed to meet the requirements of PAS 24:2012 as part of a compliant door system and BS 6375. Security of the pin is achieved by a concealed grub screw, which prevents unauthorised lift off on outward opening Endurance doors.

### Glass

Each Endurance door is glazed with 4mm toughened safety glass double or triple glazed dependent on the glass design to BSEN1279. The sealed unit is secured into the Endurance door using a cassette glazing system that has been independently tested and approved to the PAS 23/24 standards.

# You're in safe hands with our Preferred Installer Network

We only select the most talented installers to join our Preferred Installer Network, so you can be sure your Endurance door will be installed to the highest possible standard.

All of our preferred installers have full access to not only the most solid and secure composite doors in the UK, but to our knowledge and expertise, too.

With one of our preferred installers you can be sure of the best advice on choosing the right door for your home and the highest quality installation.

Visit **enduranceddoors.co.uk** to find your nearest installer today.

ENDURANCE®
PREFERRED INSTALLER

**PREFERRED INSTALLER CHARTER**

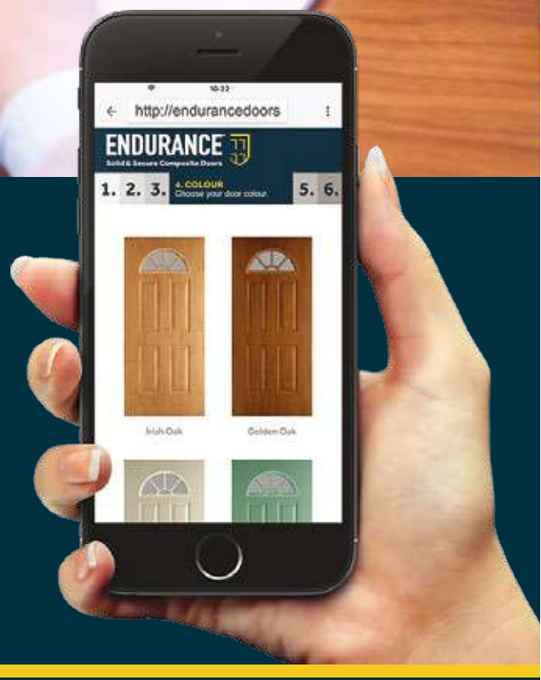

To ensure that our preferred installers reach our high standards they must meet the following criteria:

- Be a FENSA member (or equivalent)
- Installed a minimum of three Endurance Doors to our standards
- Have a clearly defined customer care policy that places the needs of the homeowner first
- Have clearly defined policies for monitoring service levels and handling complaints
- Attend regular Endurance Doors refresher product events to ensure knowledge is up to date

# Design the door of your dreams...

**The Endurance Doors online door designer features our entire collection of door designs, 16 colours inside and out, and over 30 glazing options to choose from; meaning the door of your dreams is just a few clicks away, plus you can even view it on your own home.**

# COLOUR CHOICE

COLOUR CHOICE

Endurance doors are available in a choice of 16 different colours, with the option to choose an alternative colour for the internal leaf. Most of our customers choose a white internal finish, but with so many different colours available the choice is yours.

We're also able to offer the choice of matching door frames for most of our door colours.

# FIRE DOORS

The Endurance fire door range is recommended for integral garage access into your home. Householders overlook the security of the integral garage fire door access, and most common integral fire doors have basic single locking points which are vulnerable to forced entry.

Endurance doors are tested to BS EN 1634-1:2008, the European normative standard for fire resistance. We can also offer Endurance doors with side or top light vision panels to BS 476 Part22:1987 a British standard for fire resistance. The Building Regulations for England & Wales recognise both.

**Endurance doors can be supplied as an FD30 fire door option, combined with the AV2 automatic locking system to give you peace of mind for security, as well as fire door protection.**

## Lever Pad Handles

## Slim Urn & Urn Knockers

We offer a choice choices of elegant door knockers in 7 colour options to perfectly match your letter plate and door handle. The standard urn knocker is also available with a built in spyhole.

## Door Security Guards

The Endurance door security guard offers added security by preventing the door to be fully opened when greeting a stranger to your home. The security door guard is available in a chrome or brass finish.

## Spyhole Viewer

With a viewing range of 160 degrees you can be sure of who is on your doorstep. The security spyhole door viewer can be fitted separately or combined with an urn knocker.

## Numerals

Available in a choice of 5 colours to match your door handle and letter plate, including Bright Chrome, Gold, Graphite, Satin Chrome, Black.

## Pull Knobs

## Hinges

# KEYLESS LOCK OPTIONS

## Yale Keyless Entry

Endurance doors can be supplied with a Yale Keyfree locking system with the added feature of a multi – PIN console.

Allowing you to securely lock and unlock your home either by using a remote control fob or by entering your own personal code into a built-in keypad on your door handle.

To allow friends, family or even tradesmen into your home, but without handing out your front door PIN; the multi-PIN console allows you to set a temporary entrance code just for them. After which you have the control of removing the temporary codes and access!

**No more fumbling around for keys!**

## AV2 Remote Entry

Car door remote control locking devices have been around for 25 years, and the thought of having to use a key would seem rather retro nowadays.

Endurance doors can also be fitted with a keyless remote controlled automatic high security multipoint lock. The remote locking system operates as a slam secure lock as soon as the door is closed, reducing the risk of follow on attacks or tailgating.

When leaving your home the lock automatically engages the locking hooks, rendering the property secure from the outside.

To regain entry the remote key fob must be pointed at the door which allows the handle to be pushed down; this disengages the hooks and centre latch to open the door.

# HERITAGE LOCK

The Heritage lock combines the traditional appearance of a Georgian or Edwardian façade, with the latest in high security multi-point locking.

The euro profile locking cylinder of a Heritage lock is a similar height to the traditional round cylinder pull on more traditional doors.

The lock is operated automatically as soon as the door is closed, providing the utmost security. From the inside, your Endurance door can be opened by an internal thumb turn, whilst from the outside a key is required to gain entry.

As with all our Endurance door lock options, you can be assured of the latest in high security technology.

The escutcheon and finger pulls are available in chrome, gold, black and silver colour options, and the Heritage security locking system is available throughout the entire Endurance door range.

X - Available Options

XX - Clear, Blue or Green bevel option

XXX - Black, Green or Blue tile option

Environmental concerns and energy efficiency is core to the company ethos. We appreciate the need to act responsibly, but at the same time offer our customers new advances that 'thinking green' has to offer.

**Our accreditations:**

**1.** We've reviewed our work systems and wherever possible minimised our waste and energy.

**2.** We manage an extensive recycling programme which covers packaging, polystyrene, cardboard, PVC-u, timber, paper, aluminium and steel.

**3.** All of the timbers used in our doors are harvested from forests which are managed to meet the social, economic and ecological needs of present and future generations.

**4.** The laminated veneer core is fully environmentally accredited which includes PEFC and full BM Trada 'Chain of Custody'. Chain of Custody certification outlines the requirements for tracking certified materials from the forest to the final product to ensure that the wood contained in the product originates from certified forest.

**5.** Renewable and recyclable, Kerto is a highly eco-effective door core material, throughout its life cycle. The timber is sustainably managed PEFC/FSC – certified from Finnish forests. PEFC and FSC certification ensures that the entire forest supply chain promotes good practice in the forest and ensures that timber products are produced with respect for the highest ecological, social and ethical standards. This includes protection of indigenous people's rights to the methods of felling trees.

**6.** Our transport department have reviewed their schedules to ensure that deliveries are made in the most fuel conscious manner possible, whilst preserving our assurances on delivery times.

**7.** The vehicles we chose to use have a heritage of fuel economy; low-rolling-resistance tyres, start/stop, cruise control and energy recuperation. Working together, they create instant fuel savings and lower emissions.

**8.** In the manufacture of Endurance doors we aim to source thermoplastic components and materials that contain lead-free stabilisers which are better for the environment.

**9.** The 5 chamber door outer frame PVCu profile has been specifically designed for thermal efficiency and is calcium organic using lead free stabilisers.

**10.** Endurance door frame reinforcement is thermally efficient and is 100% recycled.

**11.** Each Endurance door is entirely manufactured in the UK to minimise our carbon foot print.

## Our standards

### Endurance Doors are tested to:

**BS 6375-1:2009**
Classification for weather tightness

**BS 6375-2:2009**
Classification for operation and strength characteristics

**BS EN ISO 10077-1:2006**
Classification for thermal performance of doors

**PAS24:2012**
Classification for enhanced security for key/key operation

**PAS24:2012**
Classification for enhanced security for key/thumb turn operation

### Endurance Fire Doors

**BS EN 1634-1:2008**
Classification for 30 minute fire integrity

**BS 476: PART 22:1987**
Assessed for 30 minute fire integrity/fire door coupled to side light or top light

**BS 6375-1:2009**
Classification for weather tightness

Constructionline
A UK GOVERNMENT CERTIFICATION SERVICE

Constructionline is a Public-Private Partnership between Capita and the Department for Business Innovation & Skills. Constructionline is the UK's largest register of pre-qualified contractors and consultants, helping buyers and suppliers acquire superior goods and services within the UK.

Constructionline standards are notoriously high – all suppliers are pre-qualified to the official Government standard.
